WORLD NATURE CONSERVATION DAY—28-07-2018

On the occasion of World Nature Conservation Day on 28-07-18,a programme is celebrated and it is recognised that a healthy environment is the foundation for a stable and productive society and to ensure the well-being of present and future generations,we all must participate to protect conserve and sustainably manage our natural resources.

Trees and plants consume CO₂ which has increased the Earths temperature ,increased storms and sea level rises and freshwater ,glacier melting that threatens lives.

Birds,Bees and other insects pollinate the plants we need to eat to stay healthy and nutritionally.

Finally a few students expressed their views on the topic and the other students are encouraged to participate and to express their idea.
